

CASE STUDY DOCUMENTATION

Author: **Mohamed Hamdan**

Date: **22/07/2026**

Case Study Name: **Google Capstone - Cyclistic**

Business Task

- Find the difference between **Casual Riders** and **Annual Members**
- Find reasons why **Casuals** would become **Members**
- Design Marketing strategies aimed at converting **Casual Riders** into **Annual Members**

Data Sources and Tools for Analysis

- The data is sourced from [Divvy Trip Data](#)
- After downloading data from Jan_2025 to Dec_2025. It was found that there is around 5M rows of data to analyze
- As a result, the following data tools were decided:-
 - ◆ SQL
 - Used: **BigQuery**
 - To analyze the data
 - It is efficient and fast in handling large amount of rows
 - ◆ Spreadsheets
 - Used: **Google Sheets**

- To create tables from the queries
- It is used to do further analysis and gain insights from queries in SQL

◆ Tableau

- To create visualizations of the data
- It is best to use this tools to help understand the data at a glance

Problems Encountered in the Data (check Changelog for fixes)

- Data didn't have a way to sort the data from Jan_2025 to Dec_2025, making it hard to perform analysis
- Data given in the format Minutes:Seconds.milliSeconds (Eg: 32:43.5), which didn't give the time of the day
- Didn't specify the month in the data as the data was given separately for each month, which would be a problem when combining all the data into a single table

Data Summary

- There is more **Members** than **Casuals**
- More users during **Summer** (Jun - Sep)
- People prefer **Electric Bikes** over Classic Ones

Key Findings (How are **Casuals** different from **Members**)

(Check this [Tableau Viz](#) for Proofs)

Parameter	Members	Casuals
Top 10 Locations	Mostly travel to Commercial Places	Mostly travel to Public Attractions and Tourist Landmarks
Docking Behaviour	16% of people who don't dock	84% of people who don't dock
Travel Behaviour	Have longer displacement than Casuals	Ride longer times than Members
Start Time of Day	Start in Mornings (mostly)	Start in Evenings (mostly)

(This documentation is a surface-level summary of the data, actions and its findings, check this [Google Slides](#) for analysis results)
