- Executive Summary

Analytical Goals

- Find the difference between **Casual Riders** and **Annual Members**
- Find ways how **Casuals** would become **Members**
- Design Marketing strategies aimed at converting **Casual Riders** into **Annual Members**

Data Source and Tools

Data Source

- The data is sourced from Divvy Trip Data

Tools

- **SQL (BigQuery)** - For working with 5M rows of Data
- **Google Slides** - For doing analysis
- **Tableau** - For Data Visualizations

Summary of the Data

There is more Members than Casuals

There is more users during Summer

Total vs. Month Year

Both **Casuals** and **Members** prefer Electric Bikes than Classic Bikes

Analytical Goal 1

Find the difference between
Casual Riders and **Annual**
Members

Difference 1

Top 10 Locations Most Ended At

(Shows the most repeated end of locations by the Members and Casuals)

Most Casuals end at Public Attractions and Tourist Landmarks while Members end at commercial places and streets

Analytical Goal 2

Find ways how **Casuals**
would become **Members**

How would Casuals become Members

Restricting Electric Bikes to only Members and giving a free trial to Casuals

Why would this work ?

1

Both
Members and
Casuals
prefer Electric
Bikes

2

Electric Bikes
can be easily
tracked and
gives users
freedom

3

Electric bikes
makes travel
easier than
classic bikes

How would **Casuals** become **Members**

Giving **Members** only perks

Some Perks to give to Members

1

Rider Leaderboard and Rankings

Gives a rank (like Diamond, etc)
to make the experience from a
chore to thrilling competition

2

End-of-Year Summary

can include metrics like total
distance travelled, carbon
emissions reduced, etc

Analytical Goal 3

Design Marketing strategies
aimed at converting **Casual
Riders** into **Annual Members**

Digital Marketing Strategies

When Analyzing the data, it was found that **Casuals** mostly use bikes for leisure

Why this matters?

By targeting ads near the Public Attractions and Tourist Landmarks, we can potentially convert **Casuals** into **Members**

Executive Summary of the Analysis

How are Casuals different from Members

Parameter	Members	Casuals
Top 10 Locations	Mostly travel to Commercial Places	Mostly travel to Public Attractions and Tourist Landmarks
Docking Behaviour	16% of people who don't dock	84% of people who don't dock
Travel Behaviour	Have longer displacement than Casuals	Ride longer times than Members
Start Time of Day	Start in Mornings (mostly)	Start in Evenings (mostly)

How Casuals would become Members

- Restricting Electric Bikes to only Members and giving a free trial to Casuals
- Giving Members only perks

How to use Digital Media

Targeting ads near the Public Attractions and Tourist Landmarks

THANK YOU
